

Data **Integration**

Day 1	
Preparing Data Management Integrations	Data Integration Overview
	Setting Up Source Systems
	Registering Target Applications
	EPM Agent
	Practice session

Day 2	
Setting Up Import Formats for File Systems	Import Formats Overview
	Creating Import Formats
	Defining Import Format Mappings
	Skipping Lines in Import Files
	Concatenating Fields
	Adding Import Expressions
	Practice session

Day 3	
Completing the Integration Setup	Locations Overview
	Adding Locations
	Setting Location Details and Integration Options
	Periods and Categories Overview
	Defining Period Mappings
	Defining Category Mappings
	Point of View Overview

Day 4	
Setting Up Data Load Mappings	Data Load Mappings Overview
	Defining Data Load Mappings
	Explicit Mappings
	Mapping Rules
	Processing Order
	Importing Mappings

Day 5	
Defining and Executing Data Load Rules	Data Load Rules Overview
	Defining Data Load Rules for File-Based Data Loads
	Loading Data into Multiple Periods
	Running Data Rules and Checking Rule Status
	Viewing Imported Data
	Scheduling Data Load Rules
	Practice session

Day 6	
Processing Data in Data Load Workbench	Processing Data Overview
	Importing Source Data
	Validating Dimension Mappings
	Fixing Validation Errors
	Managing Data
	Loading Data to Target Applications
	Practice session
